

# Interpreting Graphs

## Quick Review

➤ This graph is a series of points that are not joined. It shows **discrete data**. There are gaps between values. Usually, discrete data represent things that can be counted.

Number of Students at Elm School

➤ This graph shows consecutive points joined by line segments. This is called a **line graph**. It shows **continuous data**. Continuous data can include any value between data points. Time, money, temperature, and measurements are continuous.

Growth of Sunflower

## Try These

- Would you use a series of points or a line graph to display each set of data?
  - the diameter of a maple tree over 10 years \_\_\_\_\_
  - the number of hot dogs sold on Hot Dog Day \_\_\_\_\_
  - the length of a snake as it grows \_\_\_\_\_
  - the population of Richmond, BC, from 2005 to 2008 \_\_\_\_\_

## Practice

1. a) What does this line graph show?

\_\_\_\_\_

b) About how tall was the beanstalk at each time?

• 2 weeks \_\_\_\_\_ • 4 weeks \_\_\_\_\_

• 6 weeks \_\_\_\_\_ • 8 weeks \_\_\_\_\_

c) What conclusions can you make from the graph?

\_\_\_\_\_  
\_\_\_\_\_

Height of Beanstalk

2. a) Use the graph. How many baskets of apples did Jay pick on each day?

• Monday \_\_\_\_\_

• Thursday \_\_\_\_\_

• Altogether \_\_\_\_\_

Jay's Apple Picking

b) What conclusions can you make from the graph?

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

## Stretch Your Thinking

Describe a set of data for which you would use:

a) a line graph \_\_\_\_\_

b) a series of points \_\_\_\_\_

\_\_\_\_\_

# Drawing Graphs

## Quick Review

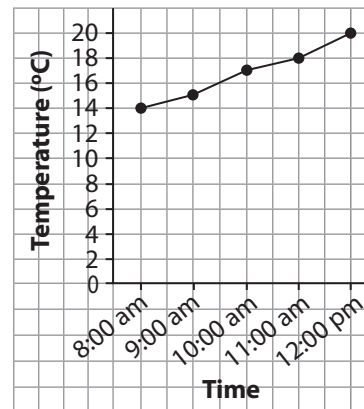

► This table shows the changes in temperature from 8:00 am to 12:00 pm on Jake's birthday.

Time	Temperature (°C)
8:00 am	14
9:00 am	15
10:00 am	17
11:00 am	18
12:00 pm	20

To display these data:

- Draw and label 2 axes.
- Choose an appropriate scale for each axis.
- Mark points for the data.
- Both time and temperature are continuous. So, join consecutive pairs of points.
- Give the graph a title.

**Temperatures on Jake's Birthday**

## Try These

- Eric jogged every day from Monday to Friday. He recorded the distances in a chart. Display these data in a graph.

Day	Distance (km)
Monday	1.0
Tuesday	1.5
Wednesday	2.0
Thursday	2.5
Friday	3.5

**Distances Eric Jogged**

## Practice

1. Sammi measured the mass of her dog on the first of the month for 6 months.

Month	January	February	March	April	May	June
Mass (kg)	3	3.5	4	5	5.5	6

a) Draw a graph to display these data.

b) How did you choose the scale on the vertical axis?

---

---

---

c) Did you join the points? Explain.

---

d) What do you know from looking at the graph?

---

---

## Stretch Your Thinking

Would you use a line graph or a series of points to display each set of data? Explain your choices.

a) The number of lunches sold in the school cafeteria every day for a month

---

b) The volume of water in a bathtub as it fills

---

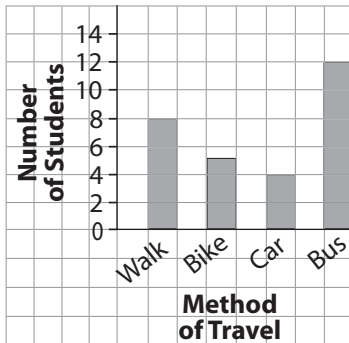

# Choosing an Appropriate Graph

## Quick Review

When you decide which type of graph to use, choose a graph that best represents the data.

How We Get to School

Bar Graph

Refreshment Sales

Double Bar Graph

Favourite Kinds of TV Shows	
Comedy	📺📺📺📺
Sports	📺📺
Reality	📺📺📺📺📺📺
Drama	📺📺
	📺 = 10 votes

Pictograph

Our Car Trip

Line Graph

## Try These

1. Draw a graph to display these data.

Our Favourite Seasons

Season	Number of Girls	Number of Boys
Spring	6	4
Summer	9	12
Fall	6	7
Winter	5	6

## Practice

1. Draw a graph to display each set of data.

### a) Students Who Wear Glasses

Grade	Number of Students
1	2
2	4
3	8
4	7
5	3
6	9

### b) Albert's Height

Age (years)	Height (cm)
2	80
3	89
4	94
5	100
6	108
7	114

## Stretch Your Thinking

How do you decide which type of graph to use to display data?

---
